Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 5-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shain et al. (USP 6,027,349), Douglas et al. (USP 5,951,492), Moerman et al. (USP 6,706,159) or Stiene et al. (2004/0096959) in view of Eason et al (USP 5,186,897) alone or further in view of Tenerz et al. (USP 4,941,473).

See the appropriate paragraph of the 3/4/08 Office action.

With respect to new claims 16-19, Shain et al. (USP 6,027,349), Douglas et al. (USP 5,951,492), Moerman et al. (USP 6,706,159) and Stiene et al. (2004/0096959) all teach optical/colorimetric reactions that include a light source to facilitate analysis. These references are silent to the use of the claimed "coherent light" or "non-coherent light."

The court decided In re Boesch (205 USPQ 215) that optimization of a result effective variable is ordinarily within the skill of the art. A result effective variable is one that has well known and predictable results. The selection of the type of light best suited to resolve the particular analyte/reagent combination is a result effective variable. The selection of either coherent or non-coherent light is a result effective variable having the well known and expected results of providing the optimal conditions to best resolve the particular analyte/reagent combination.

It would have been within the skill of the art to modify Shain et al. (USP 6,027,349), Douglas et al. (USP 5,951,492), Moerman et al. (USP 6,706,159) or Stiene

et al. (2004/0096959) and use either coherent or non-coherent light as optimization of a result effective variable and to gain the above advantages.

Response to Arguments

Applicant's arguments filed 6/4/08 have been fully considered but they are not persuasive.

Applicant's state the optical waveguide taught by Easton et al. is used in a different manner than the instant invention. These remarks are not convincing because Easton et al. has been used to teach the desirability of optical waveguides. One cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1797

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
